STATISTICAL SUBMISSION TO THE COMMITTEE ON UNIVERSITY AFFAIRS

BROCK UNIVERSITY

NOVEMBER 1972

SUPPLEMENTARY NOTES(a) Enrolment

Enrolment projections have become very much a matter of conjecture. In the light of present circumstances, we have made a further downward revision. For planning purposes we posit a very modest growth in full-time enrolment and a somewhat larger one for part-time students.

	72/73	73/74	74/75	75/76	76/77	77/78
Total F.T.	2198	2240	2276	2351	2451	2547
F.T.E. of P.T.	721.3	830*	909	965	997	1028
Total F.T.E.	2919.3	3070	3185	3316	3448	3575

*The increase in part-time F.T.E. in 1973/74 includes the revision in the conversion factor from 5.5 to 5.

We appreciate that there has been a general decline in the demand for Arts and Sciences. We would expect that part of the projected increase would arise from the new program in Administration and the proposed program in Physical Education and other activities yet to be developed which may reach beyond our existing Arts and Sciences offerings.

Graduate enrolments are based on the Five Year Plan for Graduate Programs at Brock University which has been submitted to A.C.A.P. and the joint committee of C.O.U. and C.U.A.

(b) Weights under the Formula

For 1972/73 the average weight for full-time students is 1.265 and for part-time students is 1.170. We have based our projections of income and expenditure upon a continuation of these averages.

(c) The Operating Budget

In our 1971/72 submission to the Committee on University Affairs we were principally concerned with the implications of enrolments far below the projections upon which the University's planning had hitherto been based. At that time we were faced with a probable deficit of \$620,000 on the year's operation. We were most appreciative when the Committee and the Minister responded positively to our contention that an upward adjustment in the emergent grant was called for since the fixed figure previously announced had been based on the accepted projections rather than the actual enrolment. Final determination of the emergent grant at \$926,000 and additional internal economies enabled us to budget for a deficit of \$73,000. Further frugal housekeeping reduced this to an actual \$23,000.

After making yet another downward revision of the enrolment projections we began to prepare for the lean years ahead. Since some 75% of the budget is customarily spent on salaries, this sector could not be unaffected. In our view, a deliberate policy of releasing staff was not justified in such uncertain circumstances; we have, however, allowed attrition to reduce the total complement, particularly in non-academic areas. The offices of Information and Physical Planning are now virtually closed and their responsibilities distributed among other offices. Depletions in other administrative sectors have brought the total reduction in personnel to 35. This has not been achieved without some deterioration in services. Reductions in other budget areas include one particularly vital to a new university, that of library acquisitions. In spite of these and other reductions in expenditure Brock University still faces a deficit for 1972/73 of \$383,807.

Once again a fixed emergent grant determined on the basis of a higher enrolment than has actually been achieved proves detrimental to Brock. If this grant were to be calculated on the basis of actual enrolment under the 1971/72 revised formula it would amount to \$432,200 rather than the \$350,000 previously announced. We believe that such an adjustment would be fully justified and we have already made representation to the Committee in this regard.

On several previous occasions we have expressed our concern about the sudden effects of emergence whereby even a substantial increase in B.I.U.'s would not offset the sharp decline in the emergent grant. Brock University has now reached this point and our earlier concern seems amply justified. Basic Income Units have increased by 372 or 11.2% over 1971/72. However, the emergent grant has been reduced from \$926,000 to \$350,000. This reduction of \$576,000 is the equivalent of 326 of the 372 B.I.U. increase we have worked so hard to achieve. Thus the additional income resulting from this substantial increase amounts only to \$81,198.

The income fluctuation fund or accrued reserves of \$277,000 will go a long way towards meeting this year's deficit. But the probable situation for 1973/74 and beyond must give rise to very serious concern. There will be no accrued reserves but, instead, a deficit to carry forward. Moreover, we must, for the first time, provide for the operation of the two new buildings over a 12-month period. Thus a deficit of more than \$1/2 million will be built in for 1973/74, a year in which we cannot expect any substantial increase in enrolment or in income beyond the 3.4% increase in the Basic Income Unit already announced. After two years of increasingly stringent cost cutting within Brock University, we have reached the point where further cutbacks will be devastating and must involve the release of personnel. This seems particularly inappropriate for a new university which can expect to grow in the years ahead, although much more slowly than had previously been anticipated.

We have been striving to make Brock University viable under the formula. Given a steady growth this would be possible but with the very slow growth-rate now envisaged viability appears unattainable without damaging and disruptive cutbacks in personnel, unless there is an increase in the average weighting of the Basic Income Unit for Arts and Science. In our view there is a strong case for such an increase, especially in small institutions with a minimal graduate component.

(d) Capital and Buildings

The East Block (Academic Staging Building) is now virtually complete and some sections are already in use. The Physical Education and Recreation building is scheduled for completion in March of 1973. With their completion Brock will have excellent facilities for some 4,000 full-time students, a figure previously projected for 1976 but which now recedes into the more distant future. With it there also recedes the entitlement under the capital formula which will reimburse Brock's Founding Fund. That Fund has been fully committed for the construction of the Physical Education building.

One very important feature of the Academic Staging Building project has been the provision of a link between the East corridor which it joins and the main entrance to the Tower and Library. This had been shown in the preliminary layout but was later omitted because of cost considerations for the Academic Staging Building as a whole. The architects and ourselves regard this connection as vital to the overall concept. Brock has at present no resources with which to meet the estimated \$50,000 cost of this project and can only hope that in the circumstances it may be regarded as eligible for non-formula support.

There remains the major problem posed by the Glenridge building. The transfer of Geology to the DeCew campus has freed 78,000 square feet. Adaptation of this space for Biology, the most hard pressed of the three remaining Science departments*, and, to a much lesser extent, for Chemistry will be costly. Temporary alterations, based on the expectation that a permanent home would be available for Biology by 1975 (?) are expected to cost \$100,000. However, if we adopt the premise that Biology will remain in the Glenridge building for the foreseeable future, the necessary alterations are estimated at close to \$1/2 million. Given the nature of the Glenridge building and the problems associated with providing major increases of the services, any such expenditure appears to be a poor investment.

In the long term it would seem much wiser to make minimal alterations now and plan to add a new section to the East Block (Academic Staging Building) by 1975 at an estimated \$2,750,000. Indeed, were the Founding

* 1138 course enrolments 1972/73

Fund not already fully committed to the Physical Recreation Centre we would be recommending to the University's Board of Trustees its commitment to a Biology "pod". As it is, we see no source of funding unless the Ontario government can give what might be described as a further cash advance on Brock's eventual entitlement.

It is our understanding that Ministry of Colleges and Universities records show \$1,527,400 in approved capital grants for purchase and alterations at Glenridge. Assuming that Brock were able to obtain further capital financing to the \$55.00 per square foot level, Brock University would be eligible for a further \$921,250.

Last year we pointed out that the university book store and some cafeteria space was excluded from provincial capital assistance support at the 92.66% rate which obtained at the time of completion. Our calculations show the total amount outstanding on this basis to be \$478,450.

Nor has Brock University yet received reimbursement, as have some other universities, for the initial land acquisition; this amounts to \$1,182,374. An indication that these sums would be forthcoming would enable the University to proceed on the basis of planning new space for Biology rather than incur further major expenditure on Glenridge.

(e) The College of Education

Our forecasts of enrolment, income and expenditure are exclusive of the College of Education. We are assuming that the College will continue on a line budget until it can be viable under the formula.

This year the College, alone among colleges and faculties of Education in Ontario, shows a significant increase, from 118 to 199, of whom 94 are graduates. Some 60 of the total are students who might have continued for a second or third year in Arts and Sciences (where they would have generated additional B.I.U. income), who have elected to take advantage of existing entrance requirements which will change in 1973.
